Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13 and 15-20, drawn to a tubing cutter apparatus for cutting tubing, classified in class 30, subclass 101.

II. Claim 14, drawn to a method of cutting plastic tubing, classified in class 83, subclass 13.

The inventions are distinct, each from the other because:

a. Inventions II and I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case (2) applies because the apparatus as claimed can be used to practice another and materially different process such a process of cutting tree branches or cutting elongated food items. These processes do not require the step of aligning a plastic tubing with an engagement opening of the C-shaped cutter or forcibly engaging the plastic tubing with the opening until snap engagement is achieved.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
